Employee Manager

Business Value

The Employee Information Manager is one of the core modules of this comprehensive web based application. It maintains all relevant employee related information including different types of personal information, detailed qualifications, work experience and many others. Information captured by this module is utilized by all the other modules, thus eliminating data redundancy.

With Employee Information Manager you can easily access or manage detailed information about each employee, which is essential to release the full potential of your HR team. This is particularly helpful for everybody to know who they are responsible for and who they report to.

Advantages

- An excellent way to organize your employee records into an efficient system

- Includes all the data pertaining to absenteeism, vacations, expenses, tasks, etc.

- One easily accessible place, highly configurable according to your preferences.

- Makes it easier for the senior management to make assessments regarding employee details and other criteria.
