Hospitality

Achieve your business goals faster

WebAtlante's shift management is a customizable solution which can handle the complexity of your organisation and decrease the time it takes to schedule your staff from hours to minutes. Your staff is automatically notified and can view shifts using our app or through the web.

With WebAtlante you can always be at your best even when everything is going wrong. Eliminate shift conflicts and avoid mistakes that complicate data issues and lead to expensive repercussions. Stay on top of your business even on your busiest days. Keep customers satisfied and always coming back.

Bridge the Hospitality Skills Gap: Develop and Retain Skilled Talent

With Employee Information Manager you can easily access or manage detailed information about each employee, which is essential to release the full potential of your HR team.

Drive Productivity, Efficiency, and Quality. Provide Excellent Service

Develop and ensure high performance from your teams to meet customer expectations. Drive productivity, while identifying the talent you need. Understand training requirements and use real-time data to ensure productivity.

Key Features
