

Timesheets

Business Value

The Timesheets module is a time and productivity-tracking application which enables you to seamlessly monitor your employees' timesheets from anywhere and anytime. Our card swipe technology integrates into our Timesheets module to provide valuable up-to-date information and help you gain a greater understanding of your employees' punctuality.

As your workforce grows, so does the difficulty in keeping track of employees' working hours and time worked on different tasks & projects. Our fully automatic program makes this whole process substantially easy and hassle-free to allow you and your company to gather highly accurate data and your employees improve their self-discipline and become more productive.

Advantages

- An efficient cloud-based solution where managers can easily access timesheets and use them as needed
- Reduces risk of errors common in a manual system and allows the workforce to be more productive
- Alerts and notifications sent to the admin accounts regarding employees' delays
- Highly productive, cost and time effective

Key Features

-  Individual productivity reports
-  Individual tracking of working hours
-  Supervisor accessibility from anywhere in the world to comment and review
