## Deliver value and services quickly

Use WebAtlante's GPS module to better manage and monitor your fleet and fuel costs. WebAtlante will allow you to validate if vehicles are being used in accordance to company defined policies. This way your company can cut on un-authorized and inappropriate usage of your vehicles. If a vehicle is stolen, WebAtlante gets a signal from the installed device and alerts that the vehicle has crossed a predefined geo-fence.

Our system provides fleet managers with time stamped data of any vehicle's activity. WebAtlante is built with a user friendly, intuitive interface that makes HR and resource management simple and easy. We offer a solution that's ideal for HR managers and employees alike and allows for growth within any organization.

## Centralized Employee Data: Develop and Retain Skilled Talent

With Employee Information Manager you can easily access or manage detailed information about each employee, which is essential to release the full potential of your HR team.

## Drive Productivity, Efficiency, and Quality. Build Better Products

An organisation actively depends on regular attendance of their employees in order to keep productivity at its peak and maintain unhindered workflows. WebAtlante tracks multiple leave types. It provides a quick, error free workflow for employees to organise, apply and approve leaves.

## Key Features

-  GPS module & fleet management
-  Manage detailed information about each employee
-  Leave scheduling & tracking
