

Dashboard

Business Value

The WebAtlante Dashboard module is a calendar-based representation of the HR information within the organisation. It provides the consistency, reliability and accuracy that managers need for improved decision-making using a proactive approach. The module is available in all our packages and will fit perfectly with any given organisation's needs, providing an excellent visualisation of essential company information.

A comprehensive view of your attendance data offers detailed records of your working time and a built-in shift scheduler provides a quick and convenient scheduling of your employees. You can see both your business travel plans and those of your co-workers, a handy solution for all managers who have to keep track of attendance and absences at all times.

Custom holidays and days off are yet another advantage of the Dashboard calendar allowing your team to keep track of their holidays. It also comes in handy if your company has multiple branches in different countries.

Advantages

- It includes all your attendance data in a calendar format providing a strategic outlook.
- It integrates data from multiple sources to provide users with a complete view of the business operations
- It can be used to quickly access and manage shifts and increase your ability to respond to the ever changing business conditions.
- Comprehensive information regarding your check-in and check-out times
- A useful view of your leave requests history, approved, rejected or pending
- Find all your business trips information with real-time operational data so that you're always organised and prepared
- Allows you to keep an eye on your employees' travel plans and schedules
- View notifications of company news, leave requests and more

Key Features

-  Comprehensive attendance information
-  Efficient absence tracker
-  Accurate view of holidays, leave requests and permissions
-  Detailed information of travel data
-  Track your employees' travel plans and schedules
-  Fast access anywhere, anytime and on any device with an internet connection
